RAUNHEIM - CONNECTED WITH THE WORLD

Raunheim has developed into an important technology hub in the Rhine-Main region. More than ten percent of all jobs are in the IT and Communications sector. This was accomplished through the consistent expansion of a future-oriented and attractive infrastructure.

The central location directly neighboring the airport, the immediate accessibility to the A3 and A67, as well as the superbly developed public transport system create the ideal conditions to connect with the world. Add to that the city's own high-speed fiber-optic network, which is connected with Europe's most powerful internet hub in Frankfurt. The entire metropolitan area including the new commercial areas is equipped with this future-oriented technology.

The internationality of the companies located here, the proximity to universities and research institutions, the targeted promotion of

worldwide economic contacts, as well as the expert exchange with the location's additional players create an exceptional environment for a lively, future-oriented economic culture.

Integrated Dynamic Engineering

is a world market leader in the development of vibration isolation systems for the global semiconductor industry. Its customers include all notable semiconductor and semiconductor-device manufacturers. 150 people are employed at its headquarters in Raunheim.

“Along with the conveniently situated location, we appreciate Raunheim most of all because of the variety of the infrastructure surrounding our headquarters and the dynamically growing environment. We have been located here for 17 years. What has developed here in that amount of time is impressive.”

Thomas Breser, Managing Director
Integrated Dynamic Engineering GmbH

“We have been located in Raunheim for years. With the new office buildings, we now have the opportunity to bring our employees from different locations to one hub. We were also considering other potential locations, but ultimately Raunheim convinced us due to its highly modern infrastructure and thus the optimal conditions for modern office properties.”

Ansgar Lübbehusen,
Spokesperson Lufthansa Systems
GmbH & Co. KG

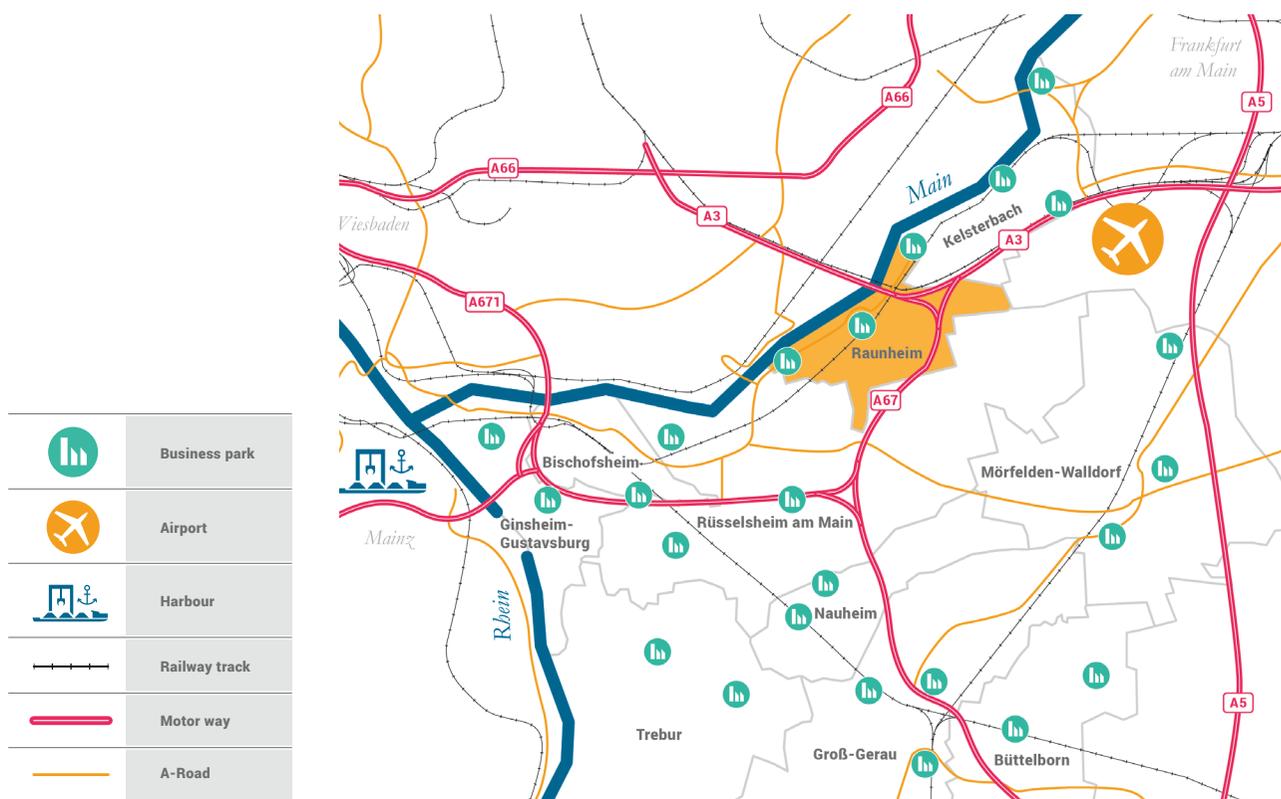

Lufthansa Systems ranks among the worldwide leading IT providers in the airline industry. Its special strength lies in the combination of sound airline know-how, many years of project experience, and technological expertise. At its headquarters in Raunheim, more than 1,000 people are employed in sales, marketing, controlling, production, and administration.
