GINSHEIM-GUSTAVSBURG - A YOUNG CITY ON THE RHINE AND MAIN

Its convenient location with direct access to the Autobahn and the railway, a harbor with transshipment opportunities by ship, railway, and truck, as well as the proximity to the surrounding major cities make Ginsheim-Gustavsburg a high-quality business location. Its economy is traditionally characterized by a high percentage of production industry. An emphasis lies on the production of goods for the automobile industry. Furthermore, well-known logistics companies have settled in the city. With the TIGZ Technology, Innovation, and Foundation Center, the city contains an important facility for entrepreneurs. Over 50 innovative and promising companies from environmental, information, and communication technology, from craftwork, the service sector, and the cultural industry have found their place here.

The location on the Rhine and Main rivers, as well as the transregional bicycle path routes and walking trails ensure that each year numerous visitors from the Rhine-Main region and other regions come to visit the city to enjoy the special atmosphere of a unique river landscape. Among the special attractions is a historical reconstructed Rhine ship mill.

iNDAT Robotics produces innovative robots for a variety of applications in all industrial areas. Through the use of modern technologies, the company regularly wins awards in the area of energy efficiency.

“The automobile industry is an important customer base. And that’s why we appreciate the location of Ginsheim-Gustavsburg, which guarantees us immediate proximity to numerous customers.”

Christoph Lacis, Managing Director
iNDAT Robotics GmbH

“We have felt right at home in Ginsheim-Gustavsburg for more than 20 years. What speaks for the location are, along with the optimal transportation connections, the many companies here in the area who are enthusiastic about automobiles as well as the well-trained skilled workers.”

Roland Nipp, Managing Director
ISUZU MOTORS Germany GmbH

ISUZU MOTORS Germany is one of the most important manufacturers of diesel motors for heavy vehicles around the world. The German headquarters located here contains one of the most modern development centers. As a member of the Rhine-Main-Neckar automotive cluster, Isuzu benefits from the synergies that are made possible by cooperations with numerous automobile suppliers in the region.
